

Detects blockage and prevents losses.

Wireless
blockage
sensor for
airboom

VISUM AIRFLOW

Quick and easy installation.

Resistant to dust, dirt, water, and corrosion.

Identifies blockage in boom delivery system.

No modifications required to existing equipment.

Replaceable battery.

100%
wireless

Quick and easy installation of the sensors.

Don't risk yield loss resulting from plugged fertilizer lines.

Innovation: no wires, extended battery life.

High strength and durability.

Wear resistant.

Track the data through the Monitor.

The J.Assy Visum monitor uses wireless technology to communicate with the sensor on each strike plate.

It will alert if there is a blockage in the delivery system. Monitor up to 99 rows
